Patent No. 6500938

GENERAL INFORMATION:
FOR APPLICANT: Janice Au-Young
APPLICANT: Jeffrey J. Seillamer
TITLE OF INVENTION: COMPOSITION FOR THE DETECTION OF SIGNALING
TITLE OF INVENTION: PATHWAY GENE EXPRESSION
NUMBER OF SEQUENCES: 1490
CORRESPONDENCE ADDRESS:
ADDRESSEE: INCYTE PHARMACEUTICALS, INC.
STREET: 3174 PORTER DRIVE
COUNTRY: USA

GENERAL INFORMATION:
APPLICANT: CHATTERLEE, DEB K.
APPLICANT: SHANDILYA, HARINI
ITLE OF INVENTION: Cloning and Expression of Rat Liver and TITLE OF INVENTION: Porcine Liver Ribonuclease Inhibitor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Query Match

; Sequence 25, Application US/0909041A
; Patent No. 6340576
; GENERAL INFORMATION:
    AFPLICANT: Bertin, John
; TITLE OF INVENTION: NOVEL MOLECULES OF THE CARD-RELATED
    TITLE OF INVENTION: PROTEIN FAMILY AND USES THEREOF
; TITLE REFERENCE: 073 PROTEIN FAMILY AND USES THEREOF
; FILE REFERENCE: 073 PROTEIN FAMILY AND USES THEREOF
; CURRENT FILING DATE: 1998-06-17
; PRIOR APPLICATION NUMBER: 09/019,942
; PRIOR PLING DATE: 1998-02-06
; NUMBER OF SEC ID NOS: 37
; SOFTHARE: FastSEQ for Windows Version 4.0
; SEQ ID NO 25
LENGTH: 3080
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  TYPE: DNA
CRGANISM: Homo sapiens
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ... (1470)

Genome Res. 10 (11), 1757-1771 (2000)
Computer-based methods for the mouse full-length cDNA encyclopedia: real-time sequence clustering for construction of a nonredundant cDNA library. Genome Res. 11 (2), 281-289 (201) cDNA library was prepared and sequenced in Mouse Genome Encyclopedia Project of Genome Exploration Research Group in Riken Genomic Sciences Center and Genome Science Laboratecry in Rikkn. Division of Experimental Animal Research in Riken contributed to
,K., Shinagawa,A., Yasunishi,A., Yoshino,M., Waterston,R., Lander,E.S., Rogers,J., Birney,E. and Hayashizaki,Y.
Analysis of the mouse transcriptome based on functional annotation of 60,770 full-length cDNAs
                                                                                                                                                                                                                                                                                                                                            Contact: Yoshihide Hayashizaki
